

SIES College of Management Studies

Internationalization Policy

1. Objective

In this globally integrated world, there is an increasing need for internalization of the institute so that the students get an international flavor during their stay at the campus for two (2) years. This will help them to become global managers / citizens while maintaining the Indian values and ethos.

2. Scope

The best way for internationalization is to get foreign students and faculty on the campus. As of today, the institute is not permitted to have any foreign students as per regulatory rules. Similarly, the institute also does not have any foreign faculty on its rolls because of the same reasons.

Hence the entire policy of achieving internationalization is attempted to be achieved through other indirect means as far as possible.

3. Policy

The institute tries for achieving its internationalization goals through various means as under:

1. Executing MOUs with higher educational institutes in other countries through which student / faculty exchanges can take place both for short as well as long-term period.
2. Directly facilitating some sessions on different topics through foreign faculty (either physically or through virtual mode) so that the students can get a feel of global happenings in their respective areas like HRM, supply chain, marketing, finance, etc. while being in India.
3. Getting the curriculum an international flavor in terms of upgrading its contours and content through a global benchmarking process, wherever possible. This enables the students to learn best practices of the global companies / entities while learning from their cases / real stories.
4. Integrating a course on "International Business and Globalization" with the curriculum so that the students can get an idea of global practices.
