SIES College of Management Studies

- A Business Technological Institute of relevance

India is on its way to emerge as the 3rd largest economy in the world and its GDP has been growing at an impressive rate year after year. According to Professor C K Prahlad, the #1 big idea that will define sustainable growth of India in the 21st Century is Relevant Education & Skill Building.

Smart organizations look for skilled and smart thinking students for their early assignments. In order to develop them with "Analytical Mindset & Thinking Abilities", business schools are required to continuously challenge their paradigm of teaching pedagogy and help students break out of their mindset.

Established in the year 1995, the central purpose of SIES College of Management Studies is to enrich the young minds by stimulating and sustaining a spirit of inquiry, directed at understanding the scientific, technological and cognitive aspects of working in organizations. We undertake activities designed to accelerate critical thinking and thus enlarge the intellectual and creative capacities of its students.

Here every faculty has moved beyond the usual management education pedagogy and instead, uses innovative ways to hone smart decision making abilities of each and every student. With the support, coaching and personalized attention of faculty as Mentors, we provide skills that are needed to solve complex business issues in the current VUCA environments. As we strongly believe in the value of quality and creative education for preparing responsible citizens, our placement record and rankings on diverse platforms as a "Top Business School", establishes our credentials and reputation. Further, as global competitiveness has become sine quo non for the success for all, including management education, the route taken by us includes optional foreign visits by students.

Besides world class application driven curriculum, which makes liberal use of simulations and cases, the two year AICTE approved MMS and MCA Programs of University of Mumbai are full of continuous live projects and internships with leading corporates.

"The best way to predict a future is to create it", as said by the management guru Peter Drucker. At SIESCOMS we make all possible effort to ensure that every student creates the bright future on the campus itself and walks out with head high on completion of the program.
